

SUMMARY

- 5+ years of professional experience in automation testing including **web** and **UI testing** using **Selenium WebDriver**, **mobile testing** using **Appium**, and **API testing** using **Postman** and **Rest Assured framework**.
- Implemented Behavior-Driven Development (BDD) framework using **Cucumber** for efficient test scenarios.
- Strong working knowledge of all phases of software development life cycle and software testing life cycle.
- Excellent understanding and knowledge of object-oriented programming and data structure.
- Experienced in cross-platform development for Windows, MacOS, Linux and Agile-Scrum environments.
- Effective communicator and Team player containing strong debugging capabilities and attention to detail.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, TypeScript

Web Development: HTML, CSS, Bootstrap, React.js, Express JS, NodeJS, jQuery, GraphQL, Rest API, AJAX, MVC, JSON

Database Management: MySQL, Microsoft SQL Servers, MongoDB, DynamoDB

Dev Tools: Jenkins, GitHub, NPM, VS code, Webpack, Maven, Heroku, SVN, Jira, Babel, Docker

AWS Cloud Services: EC2, S3, CloudWatch, RDS, Lambda, IAM, VPC, CloudFormation, Apache Airflow

Testing and Automation: Selenium, Appium, Playwright, TestNG, Junit, Postman, Cucumber, SauceLabs, Cypress

WORK EXPERIENCE

Software QA Engineer

Apr 2025 – present

XperiencOps Inc, Pleasanton, CA, USA

- Built scalable Playwright and Python automation frameworks using POM for modular, maintainable test suites and Integrated tests into CI/CD using GitHub Actions for continuous testing and Allure reporting.
- Automated functional, regression, performance, integration tests for web & API layer to ensure reliable releases.
- Integrated **custom loggers & Allure dashboards** for detailed execution reports, trend analysis, and test insights.
- Led SSO and SCIM automation with **Okta & Microsoft Entra** to strengthen identity and access management.
- Delivering manual QA for major releases, providing comprehensive bug reports and root-cause analyses.
- Collaborated closely with Engineering, QA, Security, and Infra teams to optimize release quality, feedback loops.
- Utilized AWS services and DynamoDB to automate data workflows and execute robust cloud-based testing tasks.

Test Analyst

Aug 2019 - Apr 2021

Infosys, CA, USA

- Automated testing for fintech web and mobile applications on Android, iOS using Selenium WebDriver with Java.
- Established infrastructure and framework for Mobile app testing using **Appium java client library** and **XCUITest**.
- Enhanced **Hybrid** framework and collaborated with engineering team to develop **Jenkins**-based CI environment.
- Performed **Data-Driven testing** for positive and negative data from external **Excel file** or **SQL servers**.
- Conducted **Functional** testing in production environments for web applications following **agile** methodology.
- Integrated **Sauce Labs** with an existing framework for parallel execution of test scripts on different browsers.

Software Engineer

Jan 2016 - Aug 2018

eInfochips Ltd, Ahmedabad, India

- Automated testing for **e-commerce and geosystem applications**, covering web, mobile, and API platforms.
- Performed native application testing using Appium and verified database information with SQL Server.
- Conducted testing of **REST** services utilizing **Postman**, supporting both XML and JSON data formats.
- Implemented plugins, workflows, and high-quality business processes in **CRM** for automation.

EDUCATION & CERTIFICATION

AWS Certified Solution Architect

May 2024

Full Stack Web Development

Dec 2022

Georgia Institute of Technology Atlanta Georgia USA

M.Sc. in Computer Application - Computer Science

May 2012

HNGU University, Patan, Gujarat, India
